

Dear Kory MacGregor,

I am a recipient of the Roth Heating & Cooling Scholarship and am so ecstatic to be one! Thank you for the opportunity you have given me by allowing me to attend Oregon State University—a school I wouldn't have been able to attend without scholarships.

This year so far has been fantastic. I am still on track to have a major in Industrial Engineering with a minor in Business and Entrepreneurship. I have applied to MECOP which is a program that gives two six-month scholarship opportunities to business and engineering majors. I have been able to get into the flow of how classes are and therefore have a 4.0 GPA for fall and winter term this year. I have been able to do this while staying involved as a member of the executive council for Varsity House (the house I live at), playing intermural sports, and staying connected with friends and family. Praise the Lord!

Thank you again for graciously giving me your scholarship, it is not taken for granted.

Sincerely,

Darren Buckley
